By the Boys

BAKERY

VERSION 1.0

One brand.
One standard.

Logo artwork, color, typography, packaging and booth materials, kept together in one usable system.

Review edition
Built from the direction selected in this conversation.
Recommended usage rules become the standard when this guide is adopted.

Warm. Bold. By the Boys.

A modern bakery identity with expressive lettering, clear information and a little playful energy.

Warm

Use cream space, brown lettering and welcoming, direct language.

Energetic

Use coral to punctuate. Let the wordmark and checkerboard carry the movement.

Playful

Use rounded forms and simple graphic rhythm. Keep the humor light and the information useful.

Professional

Repeat the same lettering, align supporting copy and give every element breathing room.

Modern

Keep color flat and layouts clean. Nostalgia comes through the script and checks.

Approachable

Write as a person serving a customer. Keep flavor names, prices and ordering details easy to find.

Name & voice

Write the name as By the Boys Bakery. In the logo, the descriptor stays BAKERY. Use the script artwork only for the name.

Examples already in the templates

Pick your favorites.

Planning something sweet?

One lettering system. Four formats.

Use the supplied outlined masters. Every arrangement shares the same script letterforms and BAKERY descriptor.

01 / PRIMARY Boxes, banners and the main brand signature.

02 / HORIZONTAL Tape, navigation and narrow spaces.

03 / CIRCULAR BADGE Front stickers and seals.

04 / BTB MONOGRAM Secondary stamps and sparse repeats.

Keep the logo intact.

Scale proportionally. Keep the supplied letter spacing and word spacing. Add clear space outside the visible artwork.

x = BAKERY CAPITAL HEIGHT

Leave at least 1x around full-name marks. For the badge, use its internal BAKERY height. For BTB, use one quarter of the capital B height.

Working minimum widths

MARK	PRINT	SCREEN
Primary	**32 mm**	**160 px**
Horizontal	**55 mm**	**240 px**
Badge, outside circle	**38 mm**	**160 px**
BTB monogram	**16 mm**	**64 px**

These are starting limits for ordinary reproduction. Proof at actual size on the selected material; enlarge when small details lose clarity.

FULL COLOR

ONE INK

REVERSED

Cream leads. Brown anchors. Coral accents.

Use the exact RGB values below for digital work and source artwork. Gold is an optional supporting accent.

Warm cream

#FFF3E3

RGB 255 / 243 / 227

Main background

Chocolate brown

#4B2418

RGB 75 / 36 / 24

Logo and text

Primary coral

#EF7858

RGB 239 / 120 / 88

Accents and checks

Golden accent

#F4B775

RGB 244 / 183 / 117

Optional detail

Readable text pairs

Freshly baked.

12.26:1 contrast

Freshly baked.

4.79:1 contrast

Freshly baked.

12.26:1 contrast

For normal digital text, target at least 4.5:1. Cream on coral is 2.56:1, so reserve that pair for decoration rather than readable copy.

For print, the supplier converts RGB artwork through the job's color profile and provides a physical proof. Confirm ink appearance on the actual cream or kraft stock. A universal CMYK or spot-ink match is not defined in this edition.

Contrast reference: W3C WCAG 2.2, Understanding SC 1.4.3

Expressive name. Friendly supporting type.

The logo is outlined artwork. Nunito is the supporting type family for headlines, menus, labels and digital interfaces.

NUNITO 900 / HEADLINES

Today's cookies.

NUNITO 700 / LABELS AND EMPHASIS

PICK YOUR FAVORITES

NUNITO 400 / BODY COPY

Find your next favorite cookie. Keep descriptions short, names clear and ordering information easy to read.

FORM NOTE

The booth HTML uses Nunito throughout. Editable PDF form fields use standard Helvetica fonts for compatibility; the outlined logo remains identical.

Type roles

Headlines: Nunito 900

Labels and buttons: Nunito 700

Body copy: Nunito 400

Optional emphasis: Nunito 600

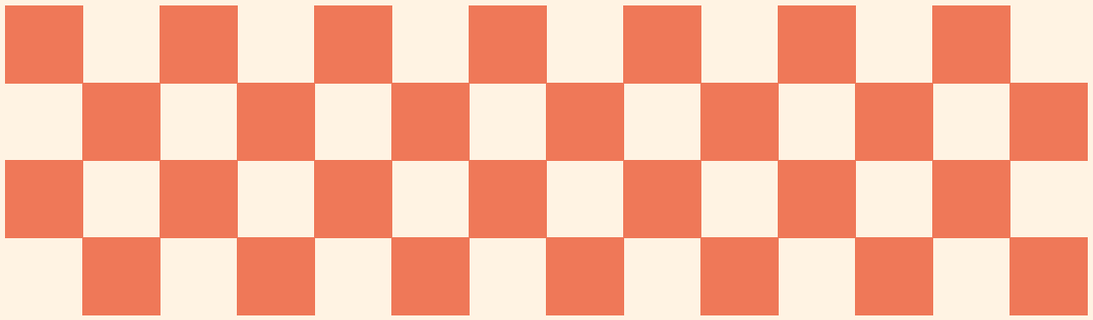

Spacing & hierarchy

Use sentence case for headings. Keep body text flush left, with about 1.4-1.6 line spacing. Use uppercase sparingly for short labels.

Use the supplied SVG for the brand name. Do not retype it in Pacifico, Nunito or another script. Do not use the logo script for paragraphs.

A few details, repeated well.

Use equal squares, round-ended accents and calm open areas. Let the logo remain the main signature.

Checkerboard

Coral and cream only. Keep the squares equal, aligned and undistorted. Use at an edge, as a narrow band, or at a large scale on booth fabric.

Keep at least one BAKERY cap-height of cream between the bottom of the descriptor and the first checker square. Apply the same margin around the whole logo.

Accents & repeats

Reuse the supplied rays and the underlines already in the logos. Keep tissue repeats sparse, with a full mark near the monogram when the brand is introduced.

Keep these out of the system

Cookie illustrations, extra scripts, gradients, 3D effects on graphic elements, distressed textures, stretched logos and rearranged lettering.

The shipping box carries the system.

Use a main logo, a round sticker and branded tape. Repeat approved artwork rather than drawing a new mark for each piece.

PLACEMENT STUDY / FRONT VIEW

Kraft is the material color, not an added brand ink. Use a cream label for the most consistent background. Direct brown printing on kraft is an option after a stock proof.

01 Main logo

Primary logo on a cream panel or label. Leave the full clear-space margin around the visible artwork.

02 Round sticker

Cream field, brown lettering and coral outline. Place on a clear front area or as a seal without crossing the main logo.

03 Branded tape

Repeat the horizontal mark with even gaps. Cream tape with brown lettering and coral accents matches the sample. Coral tape is an alternate.

One cookie. One centered sticker.

One cookie per clear bag. The sticker sits in the front middle, centered over the visible cookie rather than on the top closure.

FRONT VIEW / PLACEMENT DIAGRAM

The dashed circle indicates the cookie position only. No standalone cookie icon is part of Version 1.0.

Sticker standard

Use btb-badge-brand.svg. Keep the cream background, chocolate lettering and coral accents. Keep the supplied typography and spacing intact.

Placement standard

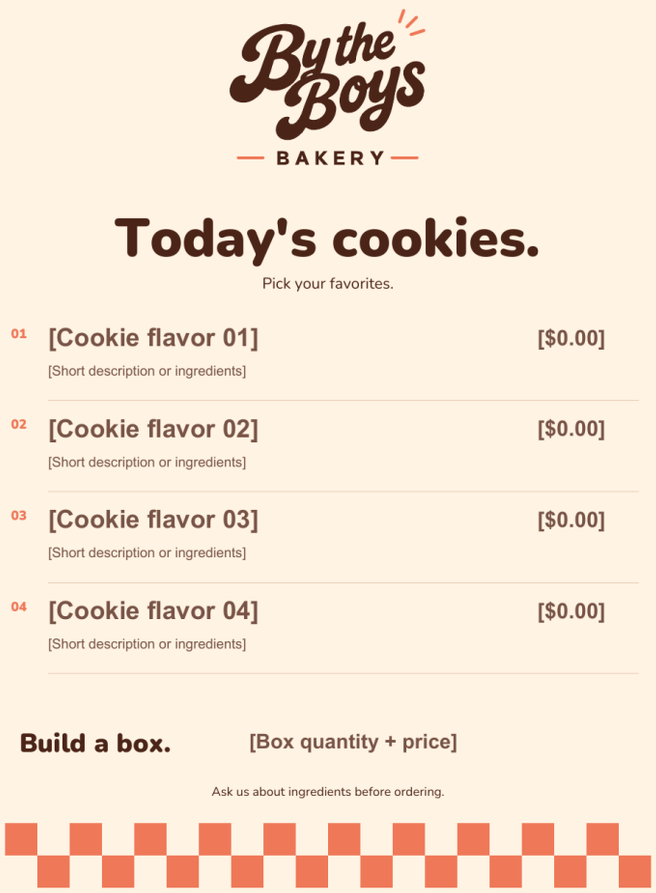

Center left to right on the bag and vertically on the visible cookie face. Keep the closure and fold above the sticker. Leave enough clear film to show the product.

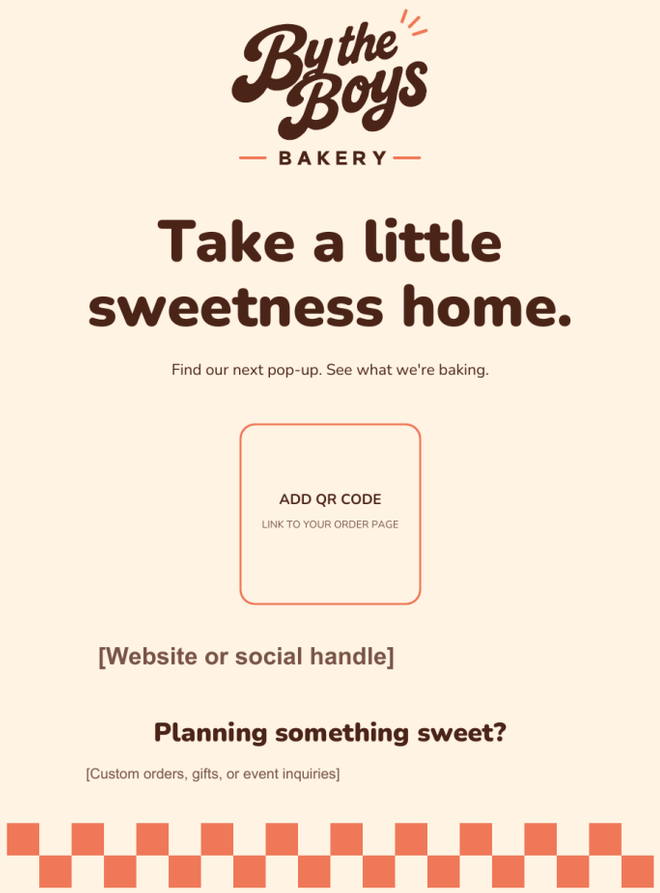

Before ordering labels

Start at 38 mm or larger across the outside circle. Check the actual bag and cookie dimensions, sticker stock, seam position and legibility before setting a final diameter.

A booth customers can read quickly.

Pair the menu with an order/follow sign. Keep the brand signature, page margins and checkerboard consistent across both.

Information first

Make flavor names and prices the main information on the menu. Keep contact details and one destination for the QR code on the second sign.

Use the templates

Replace bracketed values before use. Add a real QR image in the HTML editor. Print at Actual size on US Letter, with browser headers and footers disabled.

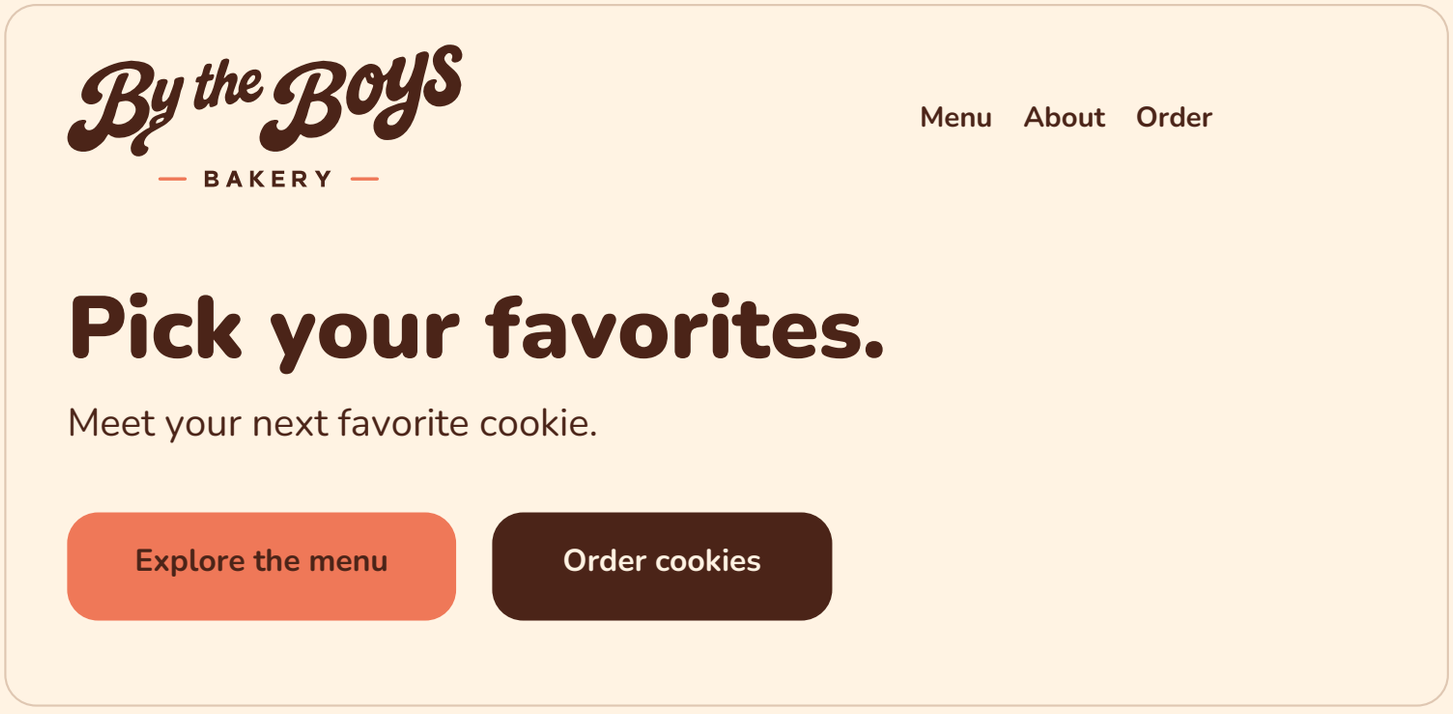

Keep the large booth banner cream with the brown logo. Use the checkerboard at a larger scale on the tablecloth.

US LETTER / PORTRAIT / 8.5 x 11 IN

Both templates have editable text fields. The menu includes four flavors, prices, short descriptions and a box offer.

Carry the identity onto the website.

Use the horizontal SVG for navigation, Nunito for interface copy and the same restrained color hierarchy.

Digital defaults

Brown text on cream. Brown text on coral buttons; cream text when buttons turn brown. Rounded buttons at 12 px and cards at 20 px. Keep decoration away from functional text.

Photography

Use actual cookies and recognizable ingredients, natural light, warm cream or kraft surfaces and honest paper textures. Let chocolate chunks, edges and the clear wrapping remain visible.

Artwork stays separate

Generated packaging photos show the direction. They do not replace logo masters or supplier artwork. Place the supplied vector logo into final layouts.

The website files in ~/code/by-the-boys-bakery have not been changed. The included tokens define the intended migration.

Make this the source of truth.

Use the versioned kit for new work. Keep previous releases archived so that old marks and new marks do not get mixed.

What is in the kit

01_Logo-Masters

SVG masters, outlined lettering and graphic elements.

02_Logo-Exports

2400 px PNGs and individual vector artwork PDFs.

03_Design-Tokens

CSS and JSON color, type and shape references.

04_Booth-Templates

Editable PDFs, HTML source and page previews.

05_Packaging-References

Selected concept thumbnails and full-image links.

06_Fonts

Nunito files and the included font license.

Release process

1. Review this guide and adopt the proposed usage rules.
2. Keep one current master folder for the bakery.
3. Update source artwork first, then regenerate related exports.
4. Record the date, version and reason for every change.
5. Give suppliers the current guide and relevant vector files.

Job details still set with the supplier

Box dimensions and dieline; sticker diameter and stock; tape width and material; bleed and cut lines; ink conversion and a physical color proof.

Version 1.0 formalizes the selected visual direction. This review edition adds recommended usage and production rules. The master-artwork hashes are recorded in the release manifest.
